Education

Course/ Qualification	Year	Board/ University	Grade/ Marks
B. TECH (CSE)	2023-2027(Expected)	University of Calcutta	7.32(till 4 th sem)
CLASS-12	2023	CBSE	75%
CLASS-10	2021	ICSE	85%

Projects

Money Mentor (Runner-up - Idea Company Startup Hackathon)

JULY 2025

- Developed a student-focused personal finance web application using Next.js 85%
- Architected server-side logic and API routes within Next.js for expense tracking and user data management
- Modelled scalable database schemas for financial records with scalability in mind
- Developed responsive, component-based user interfaces using Next.js (React)
- Enabled dynamic routing and data fetching for real-time insights
- Deployed the application on Render, focusing on performance and reliability

College Admission Management Portal

OCT 2025

- Developed admission portal managing 1000+ applications with three role-based dashboards (Admin, Officer, Student) and automated workflow management
- Integrated Razorpay payment gateway processing admission fees with automated receipt generation, payment verification, and real-time transaction tracking
- Implemented merit-based counselling system with configurable filters (percentage, rank) and bulk approval capabilities, reducing manual application processing time.
- Authored 25+ RESTful APIs with optimized MySQL queries achieving <2 second response time and implemented comprehensive analytics dashboard with admission, payment, and course-wise reports
- Developed automated document verification workflow with PDF generation for admission letters, reducing administrative overhead and improving application transparency.

Tech Stack: Frontend: React.js, React Router | Backend: Node.js, Express.js | Database: MySQL | Integration: Razorpay, PDFKit

Scientific Publication Management System

JAN 2026

- Built a role-based system to manage researchers, publications, journals, equipment, and office assignments
- Implemented secure authentication and access control using JWT for admins, office users, and researchers
- Developed end-to-end CRUD workflows, including automated credential generation and password resets
- Engineered analytical reports for office occupancy, editorial load, and publishing trends
- Designed normalized MySQL schemas and integrated a React frontend with role-specific dashboards

Tech Stack: Node.js, Express.js, MySQL, React, JWT, bcrypt, Axios, Nodemailer

Technical Proficiencies

- Languages: C++, Java, Python, JavaScript
- Frontend: React.js, HTML, CSS
- Backend: Node.js, Express.js, REST APIs
- Databases: MongoDB, MySQL
- Tools: Git, GitHub, Postman, VS Code

Achievements

- Runner-up in Campus Hult Prize
- Runner-up in Idea Company Startup Hackathon – 'MoneyMentor' project.

Languages

English, Hindi, Bengali
